BXPC3 Transfection Kit includes BXPC3 Transfection Reagent (0.5 ml / 1.5 ml / 8.0 ml), Transfection Enhancer (0.5 ml), and Complex Condenser (0.5 ml). BXPC3 Transfection Reagent is supplied in liquid form at a concentration of 0.3 mg/ml, shipped at ambient temperature.

Description:

Two component lipid-based proprietary formulation optimized for BXPC3 cells transfection.

Product Qualification:

BXPC3 Transfection Reagent is tested functionally by transfection of BXPC3 cells with a small interfering RNAs targeting 3 different genes (Lamin A/C, GAPDH, Cyclophilin B). Transfection Reagent is tested for absence of nuclease contamination and microbial contamination.

Storage:

Store reagent at 4°C upon receipt. If stored properly, reagent is stable for 12 months.

Intended Use:

For in vitro use only.

Optimizing Transfection:

To obtain the highest transfection efficiency, optimize transfection conditions by varying BXPC3 cell density and amount of transfection reagent. High passage of BXPC3 cells and use of antibiotics (or growth factors) may require using larger volumes of BXPC3 transfection reagent per reaction.
